Our Customers

At Secondary Book Press, we endeavor to give you unparalleled product and service. In this catalogue, you will find a list of exciting learner's books, course books, workbooks, colouring books, readers, and charts.

We have continuously listened to your needs, which is the main drive in our product research and development. The materials are up to date, authored by experienced writers and perfected by our well-trained editors, all aimed at ensuring that you get the very best.

A lot of care has been taken to ensure that the products are "TEACHING COMPANIONS" with the overall function of supporting the teacher in the classroom. Our products are also child centred which helps in building confident learners. We have as much as possible put in parent or guardian involvement because this is the only way we can make learning at home relevant, effective, and fun for the young ones. All the materials have employed the logical learning process of "known to the unknown".

SBP competency-based curriculum books are developed to aid in the implementation of the New Curriculum. The books are designed with a variety of learning experiences, assessments, resources and links the topics to cross cutting themes like financial literacy, unhu/ubuntu, heritage, ICT etc.

Prices

The prices are quoted in United States Dollars and are correct at the time of going to press. All prices are, however, subject to change without notice due to reprinting, inflation, and other unforeseen costs. Please note that prices and publication dates for titles not yet published are provisional and for guidance only. All prices are inclusive of VAT.

Trade terms

Secondary Book Press offers generous discounts on all publication titles to registered booksellers. Please contact our sales team for guidance and more information.

Sample copies

Secondary Book Press is pleased to supply sample copies of textbooks to teachers and booksellers who wish to examine them with a view to adopting them as class learners or supplementary books. All requests should bear the school address and a contact telephone number for the school. Send your request to the Secondary Book Press email below.

Publishing Services

Secondary Book Press invites publishing proposals from upcoming as well as seasoned authors.

Suggestions

Secondary Book Press is pleased to receive comments on existing books, suggestions for new ones and comments on customer service. Your feedback will be appreciated and acknowledged.

Sales and Marketing team

We trust that you will enjoy our products to the fullest. Our customer service team and Provincial Educational Sales Representatives are always at your service responding to all your book needs. Please do not hesitate to contact us on our indicated addresses and phone lines.

How to order

All titles in this catalogue are stocked at our warehouse at 74 Jason Moyo, 4th Floor, CABS Centre Building, Cnr 2nd Street & Jason Moyo, Harare. Please place your orders through your booksellers. However, in case of any difficulties please contact us as indicated.

About us

We are fully committed to deliver the most effective, well researched and appropriate educational resources focused on improving student learning outcomes.

Our vision

Becoming a one stop shop for Africa's teaching and learning material requirements.

Our mission

Helping learners and schools to achieve excellent pass grades.

Our values

Satisfying and creating long term benefits to our shareholders, customers, employees, suppliers and the community that we serve. Our practised core values are:

Quality

We are committed to quality and as such we shun complacency in all our duties.

Team Work

We espouse the ideals of teamwork that draw on collective effort for optimal results.

Customer Focus

Customer satisfaction is our top priority. Indeed, we recognize that our customers are the key to our success.

Accountability

We are accountable to all our customers for the services and products we offer to the market.

Integrity

We are honest and transparent in all our activities and endeavor to always uphold the same.

Early Childhood Development (ECD)

The New Curriculum formally incorporated infancy learning into the schools system in Zimbabwe. The syllabus is meant to equip the learners with necessary competencies, skills, values, concepts and knowledge geared towards developing the learners.

Our books employ an inquiry-based approach to learning in all activities hence equipping learners with the necessary skills and quest to learn and discover.

Why choosing the Plus One ECD A & B Learner's and Workbook series:

1. These books are very essential as they develop tender minds in readiness for formal learning.
2. The books are best suited for those children who are beginning to learn because they start from known to the unknown.
3. After using these books, the child will be able to recognize numbers and will be able to write these numbers correctly. This will then lay a strong foundation for the understanding of mathematics.
4. The books guide the beginner on correct letter formation and short word construction.
5. The books have large colour pictures accompanied by simple short descriptive words.

ECD A and B Learner's Books

These books have well-drawn full colour illustrations, a variety of competency-based learning activities and instructions to teachers, parents or guardians that will enable them to participate in the development of skills and values in learners.

- By using Plus One ECD A & B learner's books, learners will be empowered to engage in basic analysis of problems and to develop appropriate solutions in day-to-day life.
- Encourage the use of learning materials from the learner's immediate environment thus giving the learner an opportunity to appreciate the environment.
- Have a variety of activities which enable learners to explore and learn.
- Cover all the specific learning outcomes in the syllabus.
- Have activities which integrate the core competencies, values, contemporary issues and cross cutting themes.
- Have activities to encourage parental involvement in the learning of children.
- Have activities that enable learners to appreciate and improve their community.

ECD A and B Workbooks

Plus One ECD A & B Workbooks are interactive and easy-to-follow resources for ECD school. Finally, here is the real deal! With these workbooks, learning at this level is fun! Furthermore, the workbooks can be used both at school and at home. They provide a good platform for home schooling by parents and guardians, apart from being wonderful resources that can be used by the teacher.

Some of the key concepts reinforced in workbooks include:

- Colouring drawn illustrations – this creates memorable pictures that easily identify with the child's growing up environment.
- Joining the dots
- Matching objects
- Promotes the practical application of knowledge gained in the classroom.
- Content is based on general experiences of the learner.
- Children will be involved in activities that enhance the ability to become active listeners and speakers in diverse situations.
- Help learners to explore, interact and experiment pre-school learning.

ECD A and B Teacher's Guides

The teacher's guides are very important in the teaching of ECD classes. They are meant for teachers and sometimes can also be used by parents as they assist learners at home.

The books constitute the following features:

- Teaching guidelines
- Characteristics of the ECD learner
- Ways of becoming an effective teacher
- Involving parents in the learning activities
- Developmental abilities of a learner
- ECD learning outcomes

Information and Communication Technology (ICT) Grade 1 – 7

- The books are well aligned to the demands of the new curriculum syllabus and follow the syllabus sequence of presentation. This makes it much easier to use the syllabus in conjunction with our books in the class.
- The Plus One ICT primary series provides a broad perspective on the basic knowledge and practical skills on how to use and apply a variety of technologies in everyday life.
- The series intends to equip learners with the general understanding of how information systems are designed to suit applications and how such systems work.
- The ICT books present information in a simple way which is easy for the learners to understand from known to unknown. Therefore, each book teaches relevant skills that progresses towards basic literacy and creativity in information communication and technology.

English Language Grade 1 – 2

Plus One English Grade 1 & 2 is a complete course developed in line with the Competency-Based Curriculum. The course offers the learners appropriate skills, knowledge, values and attitudes necessary for learning English as a learning area and as a language of communication.

The course:

- begins with the basics i.e the Alphabet and takes the learner through all the fundamentals of English language.
- guide the beginner on correct letter formation, short word construction, and finally short sentence construction.
- emphasizes on vowels.
- use large lettering and correct letter formation which aids the child in easy recognition, hence ease in reading.
- guides the child through capital and small letter formation as applied in formal writing.
- introduces word and short sentence formation.

The English Grade 1 & 2 books are written in simple language that ensures easy and enjoyable reading. Parents are advised to encourage children by reading together.

Junior Primary School

English Language Grade 3 – 6

This unique series drives the competencies of the new curriculum by facilitating the acquisition of four language skills namely speaking, listening, reading and writing in an integrated way.

Some of the benefits of using this series include:

- Encourages the use of learning materials from the learner's immediate environment thus giving the learner an opportunity to learn.
- Has a variety of activities which enable learners to explore and learn.
- Covers all the specific learning outcomes in the syllabus.
- After using this book, the child will be able to read and write meaningful sentences.
- Has activities which integrate the core competencies, values and cross cutting themes incorporated in the syllabus.
- Has activities to encourage parental involvement in the learning of the child.
- Has a variety of competency-based learning activities.
- Has been harmonized with all the sound aspects of the competency-based curriculum to build the learners' vocabulary and enrich the language learning environment.

English Language Grade 7

If you're serious about getting incredible results for the new curriculum Grade 7 class then you need this book because:

1. It has got 339 comprehension questions coming from different passages with different lengths, vocabulary, and expressions. The questions build from simple to complex following the examinations style since this is a grade 7 book.
2. The book has 33 well modelled summary questions that adheres to the examination board standards for Grade 7 final exams. The content on how the questions are effectively tackled is detailed back to back with each unit giving tips to learners.
3. The book has 40 composition questions that follow the specimen exam. If you're teaching composition every week the whole year, you need about 33 questions though it is sometimes impossible. This gives you more questions for a thorough revision. Compositions include everything you know by now even the newly introduced areas like report writing, speech writing, email writing etc.
4. It has got 1195 language structures questions covering all areas that are examinable at the height of primary education. Every language aspect you may think of is well covered with a lot of vivid examples. Remember more questions from the final exam are derived from language structures. That's why we gave the area extra attention.
5. To your advantage, the book has 8 SPECIMEN TESTS. Paper 1 = 320 questions altogether testing different abilities from learners and following the standard final exam model. Paper 2 – has got 16 compositions all testing various aspects ranging from narrative to speech writing.
6. The book has 72 comprehension questions set to test all final examination techniques that will greatly help learners to prepare for the final exams.
7. The book has 8 summary questions following the new style of summaries including the number of expected words so that learners are not confused come final exam.
8. Speaking and listening is also covered at length in the book with many questions.
9. Good news for the teacher is that the book is accompanied by a well detailed teacher's guide with teaching notes, suggested media and answers to activities, exercises, revision exercises, tests, and examinations. No need for you to research for answers. Job simplified!

Visual and Performing Arts (VPA) Grade 1 – 7

Plus One Visual and Performing Arts Grade 1 – 7 series has widely been adopted in most schools in Zimbabwe. The series is very popular because it was carefully prepared to enable learners to enjoy as they further their competencies, skills and understanding of all the specific learning outcomes in Music, Visual Arts, Theatre and Dance.

These books have been prepared by experienced teachers after in-depth research to enable learners acquire the necessary knowledge, skills, values and attitudes at the end of the course.

Advantages of adopting this series include:

- Visual and performing arts is a new learning area in schools and the use of simple language in our books makes it a lot easier.
- Content is arranged from the known to the unknown which makes the subject interesting to learners.
- The well-drawn full colour illustrations in these books obviously excite learners and enhance learning.
- The series focus on competencies. More focus is directed to competencies and less to content. The goal is appropriate application of knowledge, and not necessarily its acquisition.
- Takes the learners through the learning points on expressive elements outlined in the VPA syllabus.
- Our books encourage creativity and imagination – learners can express their feelings, ideas and emotions through music, theatre, dance, and visual arts.
- These books encourage the use of learning materials from the learner's immediate environment (improvisation) thus giving the learner an opportunity to do more with less.
- Peer assessment activities have deliberately been included in the book to enable learners engage in active learning and develop their ability to reflect on what they learn from others.

The Teacher's Guides

The way we develop our teachers guides demonstrates that the teacher is a facilitator of learning, someone who guides the learners as they explore the world around them.

To that end, we know that the teacher helps the learners to build a new understanding of what they already know, learning through communication and interaction.

Physical Education, Sport & Mass Displays

Grade 1 – 7

Plus One Physical Education, Sport & Mass Displays Grade 1 – 7 Learner's Books offer support, guidance and practical ideas for effective, innovative and imaginative physical education lessons. Underpinned by easy-to-understand approach, this series is fully developed in line with the New Curriculum for Physical Education for grades 1 to 7 and provides a wide range of high-quality lessons alongside engaging, teaching examples and methodologies.

With an emphasis on inclusive physical education, the series highlight the ways in which schools can improve the curriculum implementation to ensure maximum enjoyment for all learners.

The series offer essential advice and inspiration for both the learner and practising teachers responsible for primary school Physical Education. Adopting the series at your school or buying for your child is one of the important decisions you can make when concerned about getting good pass grades.

The whole series is a must-read for all those teachers who want to make their lessons inclusive and fun whilst promoting a healthy lifestyle and enthusiasm for lifelong activity. Our books provide learners with a sense of fun, enjoyment and entertainment.

Science and Technology Grade 3 – 7

This learning area builds on the competencies that have been introduced in infancy education. Plus One Science & Technology Grade 3 – 7 is a course that provides learners with opportunities for cognitive and practical experiences that help them understand, interpret and offer practical and meaningful scientific solutions to their natural world.

The course delivers the following benefits to learners:

- Learners will develop and grow the competencies and skills in science and technology because our books follow the competency-based curriculum and delivery method.
- Learners will find themselves immersed in various enjoyable and practical activities that will help them gain actual, hands-on competencies and skills.
- Comprises of activities that will keep the learner challenged and engaged even after they have left school for home. This will ensure knowledge application, better recall and better performance.
- Learners will work in twos or in groups thereby ensuring a growing appreciation of teamwork and co-operation. This also helps to carry along all the learners so that none is left behind.
- Learners could interact with the environment for learning and sustainable development.
- They apply digital literacy skills appropriately and safely for communication, learning and enjoyment.
- Appreciate the contribution of Science and Technology in the provision of innovative solutions.
- Use scientific knowledge to observe and explain the natural world.
- Make functional discoveries through projects and activities that impact individuals and the wider society.
- Use innovative approaches as well as critical thinking and problem-solving skills to stimulate scientific inquiry, at the local, national and global levels for lifelong learning.

Heritage-Social Studies Grade 3 – 7

The learning area builds so much on the competencies that have been introduced by Family and Heritage Studies at infancy level. The Plus One Heritage-Social Studies series inculcate and sustain Unhu/Ubuntu/Vumunhu in learners as they interact with family, community and society at large.

Benefits to the learners who use the Plus One HSS series:

- It presents information in a simple way which is easy for the learners to understand, from known to unknown.
- It develops a spirit of national consciousness and patriotism through interest and involvement in national affairs, conservation, and ownership of natural heritage.
- It has a multi-cultural approach which develops an understanding of Zimbabwean cultural institutions and practices such as marriages, inheritance systems, spiritual values, and usage of artefacts.
- It comprises of several exercises per each unit which include multiple choice questions, structured questions, word matching, quiz and other games like puzzles and crosswording. These exercises and games are meant to discover the comprehensive skills of learners.
- The books also contain revision exercises and tests that help in measuring the performance of learners per forty-night or after covering a certain number of units.

Family, Religion and Moral Education (Fareme) Grade 3 – 7

The Fareme learning area builds on the competencies introduced at infancy level to promote in learners an awareness and appreciation of different religions practised in Zimbabwe.

By using Plus One Fareme books, learners are equipped with moral values, life skills and attitudes that assist them to live with self and others peacefully.

Allowing learners to study Fareme using the popular Plus One series enables them to develop effective skills in problem solving, critical thinking, decision making, conflict management, leadership, self-management and communication.

The whole series enable learners to:

- develop an appreciation of the existence of the Supreme Being as portrayed by various religions.
- foster an understanding of the importance of belonging to a family, religion, and community in shaping acceptable character, behaviour and attitudes.
- develop an appreciation of the value and dignity of hard work.

Why you should use Plus One Fareme series at your school:

- Covers various religions practised in Zimbabwe like Christianity, Islam, Indigenous religion, and Judaism.
- Comprises of clearly drawn artworks and colour photographs.
- Have varied activities and exercises designed to foster key skills like critical thinking, problem solving, leadership, ICT, communication, and team building.
- Definition of words at the beginning of each unit
- Exciting puzzles and games which make learning fun and interesting.
- The activities in the books enhance various competencies and skills for everyday life.
- The activities are interesting and make teaching and learning of Fareme fun.

Guidance and Counselling and Life Skills Education Grade 3 – 7

Plus One Guidance and Counselling and Life Skills Education Grade 3 – 7 is a learning area that targets Grade 3-7 levels. The series is designed to equip learners with age and gender appropriate, culturally relevant, scientifically accurate knowledge and life skills orientation, which will produce patriotic and self-assertive citizens who will positively contribute towards nation building.

Our books empower learners with essential life skills that enable them to survive in a changing socio-economic environment comprising the family, community, national and global communities.

Plus One G&CLSE is popular in most schools because it prepares learners for an independent, productive adulthood and life-long learning while using vivid examples, interesting activities and exercises.

The Guidance and Counselling and Life Skills topics below are covered in each book within this course with the aid of local examples, simplified language, continuous assessment learning activities, exercises, and examinations:

- Relationships, Norms and Values that shape attitudes and behaviour,
- Gender and Gender Based Violence,
- Human Growth and Development,
- Health and Well Being,
- Understanding Rights and Responsibilities,
- Educational and Career Guidance,
- Citizenship and Volunteerism,
- Management of Resources and Assets and Safety and Protection.

It will be one of the difficult tasks that teachers may find themselves in trying to teach the learning area without these books.

Plus One Serious Revision series...

The introduction of the competency-based curriculum since 2017 has shown that a lot needs to be done to improve the pass rate. One of the bold steps we took as a company is to introduce revision books for every level of learning so that learners quickly catch up with the syllabus demands.

Learners lost a considerable amount of time during the lockdowns from March 2020 to January 2022. A lot of learning time was disrupted again following the enforcement of social distance measures put in place by government which saw learners attending school at most 3 days a week.

It is against this backdrop that we continue to find means to help every child despite the circumstances. Our revision series help learners to bridge the syllabus and catch up so that they are not disadvantaged when writing the final Grade 7 examinations.

Serious Revision Grade 7

Plus One | Agriculture, Science and Technology Grade 7 Revision Guide (with answers/ without answers) combines and examines three different learning areas merged to form Agriculture, Science and Technology examination. This book contains key insights and summarised information that simplifies and answers all the merged objectives for Agriculture, Science and Technology and Information and Communication Technology syllabuses. Its features are as follows:

- Written by well experienced teachers who participated in the development of the new curriculum syllabuses.
- The book boasts with well researched typical examination questions for both multiple choices (Paper 1) and structured questions (Paper 2).
- Examinations are set by multiple experts with different backgrounds and testing strengths giving each exam a new feel, tone and ultimately questioning techniques.
- All the typical examinations are well balanced and follow the Bloom's taxonomy which emphasizes that teaching and learning should start from simple to complex concepts.

This book is accompanied by Plus One | Agriculture, Science and Technology Grade 7 Serious Revision Guide (Workbook without answers). In a workbook, learners get a chance to practice writing answers on typical Grade 7 examination answer sheets for structured questions and proper shading for multiple choices.

Serious Revision Grade 5

The revision series for Grade 5 revises the syllabus objectives for grade 5 only. The idea is to take revision to all the grade levels without only limiting it to grade 7. By the time learners reach final primary examinations they will be used to the examination structure and will be able to manage exam fever. The books also give chance to teachers to measure the progress being made by learners in comprehending the syllabus objectives.

The books have;

- comprehensive revision notes - worked-out examples, localised examples and simplified guidelines.
- solved examination style questions - examination style questions
- a lot of questions for purposes of practice.
- answers to the given questions as well to allow self-assessment.

Primary Readers

These readers are aimed at enabling learners to focus on the well-being of the world they live in.

This is a beautifully illustrated series of books that retell familiar stories of the everyday life in the simplest manner. The stories themselves invite the child to grow in values and discover the principles that build character.

PlusOne Readers ... is a series of carefully written and illustrated stories that enhance honesty, integrity, and life skills of the reader. Readers have an opportunity to achieve more in one title. They read, enjoy, and learn language and life lessons with a purpose of establishing a virtuous society

Plus One Primary School Charts

A common, effective teaching method is to use visual presentations in a classroom. The Plus One Primary School charts series presents charts and diagrams meant to help learners to see ideas visually laid out in an organized way.

Also, our visual tools (charts) can help the students process content and to make connections more easily. Teachers can purchase our charts to display around the room or use them as part of a lesson. These tools are especially useful in primary school, where children tend to have shorter attention spans.

Half the times, teachers spend much of the time preparing charts to display in classroom especially when assigned a new class. The time taken and resources used are just a lot when compared to buying already prepared charts like these ones.

Below are some of the charts that we have designed in line with the demands of the new curriculum. They touch on all key aspects of different subjects like Maths, Science, Agriculture, Indigenous languages, Physical Education, Visual and Performing Arts, Family, Religion and Moral Education, Heritage – Social Studies as well as Guidance and Counselling.

Secondary Education

A *Practical* Approach to

A Practical Approach to... Secondary School Learner's Books have been developed in line with the secondary schools syllabus for Zimbabwe. The four-level learner's books offer students and teachers all the information needed to cover the syllabus and comprehensively prepare the students for the examinations. The structures and functions of the subjects are taught through imaginative and stimulating exercises and engaging activities.

The learner's books keep the students abreast with the knowledge, techniques and skills involved in the learning of each subject. The accompanying Teacher's Guides have been written following the guidelines issued by the Curriculum Development and Technical Services and offer guidance and support for teachers.

A Practical Approach to Physical Education, Sports and Mass Displays Forms 1 – 4

At the end of this course learners must be in a good position to accomplish the following objectives:

- demonstrate knowledge and understanding of the structures and functions of the human body related to movement.
- improve health and skill related fitness as well as movement factors affecting performance.
- demonstrate an understanding of health, nutrition and fitness in relation to Physical Education, Sport and Mass Displays.

Benefits of using the books:

- There are opportunities for revision for example in text questions, tests, exercises, quiz, etc.
- The activities are varied i.e they include multiple choice questions, short answers, matching exercises, fill in exercises, essays, projects, research, modelling).
- Each chapter has at least 15 multiple choice questions, structured questions which calls for short answers and there are Practical Questions which give room for learners to carry out continuous assessment.
- In each book at the end of 3 or 4 chapters there are full scale examinations set within the dictates of the syllabus. The exams guide and prepare learners to face the first term, second term and or end of year examinations.

A Practical Approach to Family and Religious Studies (FRS) Form 1 – 4

This series is one of the most popular when it comes to Family and Religious Studies in Zimbabwe. Some of the reasons why its most preferred:

- It was written by well experienced authors.
- The concepts are well simplified to suit the level of learners.
- At the end of each key concept presentation there is an exercise.
- In addition to the exercises mentioned above, the books consist of 5 structured questions and 5 essay questions at the end of every chapter. This help learners to sharpen their skills of application.
- The book has got 3 full examinations. Each is set after 4/5 chapters.

A Practical Approach to Business Enterprise Skills Form 1 – 4

The series is learner centred and give them a detailed complete coverage of the syllabus objectives. Benefits of the books:

- well-structured content as outlined in the syllabus.
- interesting facts about the subject that motivate and stimulate interest in the learning of Business Enterprise.
- activities that require learners to actively participate in the learning process.
- knowledge of facts, concepts, functions of the business enterprise skills.
- demonstrate an enterprising culture, apply skills of numeracy, literacy, inquiry and use of information to present and interpret business data.
- thorough contextualised revision exercises at the end of the chapter and follow up examinations meant to evaluate the extent to which taught skills and knowledge have been grasped.

The whole series incorporates invaluable recommendations made by practising teachers and educationists.

A Practical Approach to Geography Form 1 – 4

The series has the following key features:

- All topics presented in the syllabus.
- Full colour maps to enhance understanding of mapwork.
- Complete coverage of new areas introduced in Geography like GPS, GIS etc with a lot of localised examples as well as simplified content.
- Objectives are listed at the beginning of each chapter to guide learners.
- Case studies to help students understand concepts.
- Plentiful opportunities for revision through many continuous learning activities, exercises and examinations to test students' progress.

A Practical Approach to Biology Form 3 and 4

We believe these books will be of great help to teachers teaching the subject and students preparing for the O Level Biology examination.

Important concepts are highlighted in each topic, with relevant examples and diagrams to help students learn how to apply theoretical knowledge.

978-0-7974-82620-3	Biology Form 3 (LB)	US\$ 19.91
978-0-7974-8301-9	Biology Form 4 (LB)	US\$ 19.91

A Practical Approach to English Form 1 – 4 & “O” Level Revision

We are delighted to be the publishers of this much needed series up to English ‘O’ Level Revision Book. Individual learners who are serious about outstanding results need this series because of the following reasons:

- It has a well-laid out grammar section which caters for building up basic grammar concepts needed at Ordinary Level.
- It thoroughly deals with all the co-components of the O Level Zimsec English examinations. These co-components are dealt with individually before they are given as revision exercises or examination practice material.
- Every co-component being explained is tested to ensure retention of concepts.
- Each book has 3 or 4 sets of real examination-styled question papers to give learners the feel of the depth and diverse nature of the entire scope of the Zimsec examinations.
- The comprehension passages themselves reflect both the depth of English and significance of material which real examination passages do.
- The summary questions, also, give a befittingly challenging testing of summary skills – if not harder – so that once learners outsmart them, they are assured of passing.
- The Supporting Language Structures, also, give learners so much wide coverage, and, after they have thoroughly gone through the grammar section, they find it smooth flowing going through the revision papers.
- The guided composition and composition section is well-adopted to real examination-style stuff in terms of level of difficulty, diverse nature of questions and exemplification of answers.

A Practical Approach to Principles of Accounting Form 1 – 4

This series is suitable for anyone who wants to get a good background in financial accounting. It is ideal for learners who are starting to study the subject from form 1 right up to “O” level. The books follow the demands of the competency-based curriculum introduced in 2017.

Characteristics of the books:

- Learning objectives are outlined at the beginning of each chapter comprising everything that a learner needs to have learned by the end of the chapter.
- Activities occur frequently throughout the book to test comprehension of new concepts.
- Consists of several worked examples that are provided to guide learners through more difficult concepts.
- Each chapter ends with a selection of practice questions to prepare learners for examinations.
- A variety of multiple-choice questions that allow learners a quick and easy method of checking their own progress as they work through the series.
- The examples used in the books are well contextualised and are very realistic to suit our own values as a country.

A Practical Approach to Chemistry Form 3 & 4

The course provides a summary of the facts and concepts that the learner needs to know for the ordinary level chemistry examinations.

The books explain the data-handling skills a learner needs to answer some of the questions in the written papers. They also explain the practical skills that a learner needs to do well in the practical examination.

The books use scientific language because scientists take great care to use language precisely.

978-0-7974-8301-9	Chemistry Form 4 (LB)	US\$ 19.91

A Practical Approach to Computer Science Form 1 – 4

This is a learner-centred series for Forms 1 to 4, written by information technology specialists, with a step-by-step approach that ensures full syllabus coverage. Each concept is carefully explained so that individual learners can progress at their own pace.

Features of the whole series:

- An introduction at the beginning of each unit to stimulate interest and test prior knowledge.
- Practical and written activities that can be completed with minimal resources.
- Screen shots and step-by-step guidance to sharpen computer skills in a practical way.
- High quality illustrations to assist understanding of concepts.
- Revision exercises at the end of each topic and at least 3 examinations per each book.

A Practical Approach to History Form 1 – 4

The books provide learners with the means in which they will develop a historical view of Zimbabwe, Africa and the wider world. The course helps them to acquire an informed and critical understanding of social, economic, and political historical developments.

Characteristics of the books:

- There are opportunities for continuous assessment - each chapter offers a range of continuous assessment activities with clear instructions to the learners.

- The summative assessment objectives in the syllabus are being utilised in the formation of exercises and tests.
- The activities encourage research and innovation.
- The activities encourage problem solving skills, creative thinking skills, leadership skills, & ICT skills.

A Practical Approach to Commerce Form 1 – 4

These books introduce learners to commerce. They have been written to meet the requirements of the Zimsec examinations syllabi for secondary schools. The series provide coverage of the entire syllabus with detailed notes, activities, simplified content, continuous assessment tips, revision exercises and examinations.

These textbooks include the following features:

- guidance as to the material that is covered in each chapter.
- definitions of key terms to assist learners in mastering the language of business.
- study tips to help learners to prepare for examinations in commerce.
- diverse case studies to illustrate how theories and concepts operate in the real world.
- a range of questions and activities to help learners to reinforce their learning and to develop the skills needed to succeed in life.
- a selection of past examination questions.
- the series is written in simple and straightforward language to help learners understand and remember facts.

A Practical Approach to Physics Form 3 & 4

The books cover the new curriculum 'O' level Physics theory and practical activities in the following areas: Newtonian Mechanics, Dynamics, Waves, Electricity and Electromagnetism, Thermal Physics and Modern Physics.

Aims of the books:

- create opportunities for learners to acquire research, experimental and practical skills and attitudes in Physics.
- enable learners to acquire basic principles of Physics for application in life and as a basis for further studies in Physics and related disciplines.
- Topics are covered at length with the aid of local examples, simplified physics language, engaging and interesting activities, revision exercises and thorough exam practice.
- The course offers solutions to the difficulties that learners encounter when handling numerical concepts in Physics. These books have the following features that make them unique products:
- A variety of worked out examples per topic with working tips, hints or steps, thereby stimulating the thinking of the learner as opposed to encouraging cramming.
- Has self-assessment activities at the end of each topic/subtopic for practice by the learners.
- Has answers in content to all self-check exercises for self-evaluation.

978-0-7974- 8266-1	Physics Form 4 (L.B)	US\$ 19.91

A Practical Approach to Guidance and Counselling and Life Skills Education Form 1 – 4

Our Guidance and Counselling course books seek to empower learners with essential life skills that enable them to survive in a changing socio-economic environment comprising the family, local, national, and global communities. They prepare learners to cope with developmental changes and a variety of risky factors such as HIV and AIDS, early marriages, teenage pregnancies, drug, and substance abuse.

Benefits of using the books:

- Have a variety of activities which enable learners to explore and learn.
- Covers all the specific learning outcomes in the new curriculum syllabus.
- Have activities which integrate the core competencies, values and contemporary issues.
- Have varied exercises, multiple choice questions, revision tests and examinations.

A Practical Approach to Food Technology and Design Form 1 – 4

- The books cover all the topics included in syllabus with depth while using simple language, technical language and a lot of local environment examples. This makes the whole series stand out to learners and teachers.
- The books are also written by experienced teachers who understand the teaching and learning needs of the subject. During the book development process our experienced authors tried to strike a balance between theory and relevant classroom practice that practitioners go through on a daily basis.
- Each book in the series comprises of multiple in-class exercises, CALA activities, unit revision exercises, Zimsec standardised specimen examinations covering first, second and third term.
- The pictures used are very clear, well labelled and help learners to quickly grasp difficult concepts.
- The whole series is well coordinated in such a way that it helps learners to apply hygienic and safety measures in cooking, preservation and storage of food.

Complete Practical Approach Mathematics “O” Level Revision

Helps the learner to:

- practise and understand mathematical problems.
- identify the relevant and appropriate formula to use whenever presented with a mathematical problem.
- get familiar with exam-style questions.
- confidently and correctly substitute given quantities in the correct formula.
- identify the correct operations and the sequence in which they should be applied.
- has many examples to enhance understanding of theories and concepts in mathematics.
- incorporates current developments in the learning of mathematics.
- provides knowledge through notes and illustrations containing all the essential information on the whole syllabus.
- provides practice by applying the knowledge and principles learnt in each topic.

Advanced Level textbooks

*Excel
Advanced level in*

Excel Advanced Level in ... are course books designed for forms 5 and 6 students studying the new curriculum Zimsec syllabus in Zimbabwe.

These books combine the form 5 and 6 syllabuses and fuse them in a sequential and easy to follow style to come up with one comprehensive textbook for Advanced level students. The syllabus is written in spiral form, so it is easy to fuse topics and present them in one book for the whole course. Once the student has overcome the book, would have covered the whole syllabus objectives.

In yesteryears advanced level students struggled to get locally written learning materials as most of the texts were imported from other countries especially United Kingdom. The advantages of **Excel Advanced Level in...** series is that the books were developed by well experienced Zimbabwean teachers who have been in the education system for a very long-time practising, marking or even setting the final examinations.

The introduction of the new curriculum requires A-level textbooks that are meant to exhaust the syllabus objectives and some of the incorporated concepts especially in science, religion and history subjects are nowhere to be found in imported books. To bit this inconvenience, use tailor-made learning materials.

Benefits to students:

- Tailor-made books to suit all the demands of the new curriculum course for forms 5 and 6.
- Use local case studies and examples to explain theories and concepts.
- Developed by experienced practising teachers some of whom are marking A-level exams.
- Comprises of varied exercises and activities that allow students to stretch their minds.
- Revise some of the past exam questions using a step-by-step approach.
- Content is structured in a simple way for easy understanding of facts and concepts.
- Clearly drawn illustrations or photographs are used to simplify content.
